LIFE HISTORY OF A STRANGE TREE: THE STRANGLER FIG

Create a final project that illustrates your understanding of the life cycle of the strangler fig. Your project must include images (e.g., photographs, drawings) as well as words (e.g., a paragraph, a list, a script).

When you have come up with an idea for your project, check with your teacher for approval. Here are a few suggestions:

- Create a comic strip or mini-graphic novel.
- Create a flip book with an accompanying description.
- Make a short documentary (can be audio-only like a radio program or audio and video like a television program).
- Write a children's book.
- Create a slideshow.
- Write and perform a skit.
- Build a model and provide an accompanying description.
